

JOB OPPORTUNITY

Associate Programmer Analyst (Specialist) / \$4,467 - \$5,703 Web Application Support/Software Branch/Engineering Division

The Department of Technology Services (DTS) is seeking a programmer with experience/interest in web-based application development to join a growing team of developers who develop and manage web-based software solutions for DTS' state and local agency clients. Team members will typically develop applications using Microsoft technologies such as ASP.NET 2, ASP 3 and Windows SharePoint Services. This position is a permanent, full-time Associate Programmer Analyst position within the Web Applications Support Unit, Internet Services Section, Software Branch, Engineering Division. The location of this position is Rancho Cordova.

Essential Functions:

- Background developing web-based applications using Microsoft-based technologies such as ASP.NET, Visual Studio 2003, C#, Visual Basic.NET, Active Server Pages, Visual SourceSafe, etc.
- Ability to identify and evaluate problems and issues. Written and verbal communication skills to be able to present the problem and recommended alternatives.
- Assist in discovering and documenting system requirements, developing various types of system documentation, and assisting with system testing.
- Assisting in providing second level support in troubleshooting and resolving application-related problems reported by DTS' customers.
- Assist in the implementation and maintenance of web-based commercial off-the-shelf server software the Unit provides to DTS clients (e.g., listserv).
- Assist in the design and modification of application databases. Develop and modify stored procedures, triggers, and other database-related code.

Work Environment Requirements

- Sufficient vision to perform application/database development.
- Hearing and speaking must be sufficiently acute to communicate with staff and clients.
- Sufficient hand and finger ability to repetitively use a computer keyboard and work with computer equipment.
- Ability to sit or stand for extended periods of time when working at a computer.

Desirable Qualifications:

- Knowledge and/or experience developing web applications using PERL and/or Java Server Pages.
- Knowledge and/or experience using and/or developing solutions using Windows SharePoint Services.
- Ability to work independently and with people and a strong customer service ethic.
- Ability to work independently and collectively.
- Effective verbal and written communication skills.

Applications will be accepted only from individuals currently at the **Associate Programmer Analyst (Specialist)** level or applicants who have transfer or promotional eligibility. Applications will be screened based on desired qualifications, and only the most qualified will be scheduled for an interview. All appointments are subject to SROA/Surplus provisions.

Final File Date: UNTIL FILLED Interested applicants must submit a State application to:
